

How to select your next
time tracking solution

rite.SOFT®

1

Evaluate your processes & identify your pain points

Manual entry

Messy time sheets

Paper processes

Lost Job Travelers

No Job Standards

Reports

Job Visibility

Timeclock errors

2

Does your business need a diet?

Duplicate entry

Non-competitive Job costing

Wasted time

Lack Job visibility

Data lags

Incomplete info

Low Efficiency

3

Evaluate options based on your needs

- Custom or Standard
- Real-time system integration
- Functionality requirements
- Ease of use
- Implementation time
- Self-Administered without expert
- Easy to update and maintain
- On-going system / device compatibility
- Budget-friendly

4

Do you need a Custom or Standard solution?

	Criteria	Custom Solution	Standard, Plug & Play
Built to exact needs	✓	Meets 80% + of needs out of the box Configurable to match processes ?	
Real-time System Integration	?	?	
Ongoing Compatibility	Updates require more customization	✓	
Budget-friendly cost (initial & ongoing)	More costly	✓	
Easy to update & maintain	Time consuming; Future incompatibility	✓	
Implements quickly	Slow, 1 year	✓	

Standard solution solves problems with simple processes

5 What do you want to track with mobile devices?

Scan barcodes / Use touch screens

- 1 Punch in/out (Time Clock, Jobs, & Tasks)
- 2 Manufacturing: Job Cards / Travelers
- 3 Off-site time tracking
- 4 Production & Work Center Data (Direct vs. Indirect)
- 5 Safety assessments, COVID screening, & more

6 Check the features against your key needs

Clock in & out fast (On-site or off-site)?

Device requirements / flexibility?

Track labor, Jobs, & more on touch screens & mobile devices on the shop floor as work happens?

Standard Plug and Play or Custom?
Available set-up options? Configurable?

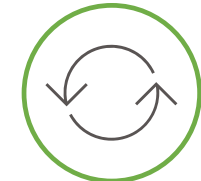

View dashboards & reports for real-time visibility & performance monitoring?

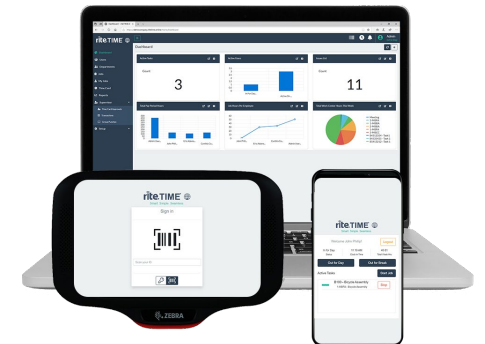

Real-time Dashboards & Reports?

Integrates to save time and reduce duplicate entry?

Total cost of ownership?
